

PELETI HANISHYA

Bengaluru, Karnataka, 560050 | pelletihemachandrika@gmail.com | +91-9019912809 | linkedin.com/in/hanishya-pelleti | <https://github.com/Hanishyapelleti>

Motivated AIML student (CGPA 9.43) with hands-on experience in computer vision, deep learning, NLP, and full-stack AI development. Seeking an AI & Industrial Intelligence internship to develop AI solutions for worker safety, anomaly detection, industrial monitoring, and smart manufacturing systems.

EDUCATION

BNM Institute of Technology
2023–2027
B.E – AI & Machine Learning | CGPA – 9.43/10

Sri Krishna Chaitanya Jr. College
2021–2023
PCM Stream | 83.7%

Narayana Concept School
Grade 10 | 97%

TECHNICAL SKILLS

Languages: Python, Java (Beginner level)
ML / AI: Machine Learning, NLP, Deep Learning, CNN, U-Net, RAG, Vector DBs, LLM Integration
CV: OpenCV, IPCV, TensorFlow, PyTorch, scikit-learn
Web: HTML, CSS, JavaScript, React
Backend: Flask, FastAPI, Node.js, Express.js
Databases: MySQL, MongoDB, Firebase
Tools: Git, GitHub, Data Annotation, Model Evaluation
Research: Literature Review, Benchmarking, Model Performance Evaluation, Technology Exploration, Rapid Prototyping

SOFT SKILLS

Hardworking
Adaptability & Quick Learning
Team Collaboration
Problem-Solving Mindset

LANGUAGES

English (Proficient)
Telugu (Native)
Kannada (Basic)

PERSONAL DETAILS

Date of Birth: 28 September 2005
Gender: Female
Nationality: Indian
Father's Name: Pelleti Mahidhar Reddy
Native: Nellore, Andhra Pradesh
Interests: Travelling, Listening to Music

INTERNSHIPS

Capabl — AI/ML Intern *June 2025*

- Built an AI-powered Mental Wellness Assistant using NLP agents and the MERN stack with intent detection and guided interaction flows.
- Developed RESTful backend APIs and managed MongoDB databases; conducted model performance evaluation and improvement cycles.

Skillcraft Technology — Cyber Security Intern *Sept 2025*

- Applied cybersecurity fundamentals through hands-on projects: Caesar Cipher, image encryption/decryption, keylogging simulation, and password strength analyser.

PROJECTS

Pulmonary Embolism Detection System
OpenCV · U-Net · TensorFlow · PyTorch

- Engineered an end-to-end deep learning pipeline using U-Net + IPCV on CT scan data, achieving 85% accuracy classifying PE vs Non-PE — directly analogous to industrial defect and anomaly detection.
- Applied image preprocessing, data augmentation, normalization, and model evaluation with OpenCV and scikit-learn; mirrors PPE detection and safety monitoring workflows.

AI-Powered Mental Health & Support System
Python · Flask · FastAPI · NLP

- Wellness platform with chatbot-based emotional support, real-time sentiment analysis, mood tracking, and a secure Flask/FastAPI backend with structured REST API endpoints.

AI Legal Assistant
Python · RAG · Vector DB · LLM

- RAG-based assistant for contract analysis, clause extraction, risk detection, and intelligent legal Q&A using vector databases and LLM integration.

Cloud-Based IP Geolocation & Monitoring System
React · Flask · Firebase

- Real-time IP tracking dashboard with geolocation API integration, automated email alerts, regulatory enforcement, and Firebase cloud storage — relevant to industrial IoT monitoring platforms.

ACHIEVEMENTS

- Hackathons: VIT (AI to Glow), UVCE (Impetus 25.0), UNESCO Youth Hackathon, Eureka by IIT Bombay, SIH Hackathon, Healathon by PES University.
- Participant — Science in Action 4.0 Quiz & Sustainalytics in Phase Shift 2025 (sustainability & industrial tech).
- NSS member actively involved in community outreach and social impact activities.
